PAID
Price $3.00

THIS Port-Folio is published, not as a catalogue, but to show the general character of our work.

It is issued in this form to permit new plates of our best work to be added, which will be sent, from time to time, with the hope that the holder of the book will insert them therein.

We do not endeavor to carry any considerable amount of stock work. Owing to the variety of color, size, shape and quantity required for the buildings at present, it would be useless to try to anticipate the demand. The monotony of design which formally characterized buildings in general, is giving way to more originality. Even small dwellings, tenement houses and warehouses of to-day show evidence of design; and this has been made more possible by the use of terra cotta, which affords a consistent, practical, cheap and artistic material for both structural and decorative purposes.

We have, however, the moulds of a great variety of work, which we can supply at very short notice—as short as two weeks, when the work is not heavy or great in quantity. Plates 66 to 76, inclusive, comprise this work. Estimates furnished on application.

It is not necessary to say much about the quality of our terra cotta; having been in the business several years and having furnished material for many of the most important buildings in the country, it will suffice to point to these.

Following is a list of some of the buildings for which we have supplied terra cotta.

Respectfully

CONKLING-ARMSTRONG TERRA COTTA CO.

PHILADELPHIA, JULY 7, 1898
